Baroque in Bohemia, a registered association, is an organization whose aim is to culturally revive the chapel of St. Anna, a building with a unique architecture and layout in the town of Nečtiny. The “*Awakening of the Nečtiny chapel*” project builds on the rich history and traditions of the place that used to serve also as a space for theatrical work under the name “*Chapel Studio*”.

The chapel is used for residential stays of artists within the project “Pilsen 2015”, and events organized by the town. The goal of the project is to look for a way of running an extensive cultural space, to open a public discussion about the meaning and forms of culture and art in the life of the Pilsen region, to offer an exceptional artistic experience, and to draw the visitors’ attention to the baroque sights and touristic attractiveness of the region.

Baroque in Bohemia in this activity cooperates with the town authorities and the Regional Museum of Nečtiny, through the memorandum on cooperation with Pilsen 2015 (ECC 2015), and a number of other professionally successful cooperating subjects and people from the world of music, theatre, film and visual arts.
